

BUDDY RHODES CONCRETE COUNTER MIX

Buddy Rhodes Concrete Counter Mix (patent pending) is a refined combination of sand, cement, marble, and our own secrete ingredients that have given Buddy's pre-cast concrete its warm quality and versatility for over 20 years. The counter mix is ideal for use with a variety of production techniques including casting right-side-up (pre-cast or cast-in-place) for a trowelled or ground finish or upside down (pre-cast only) for a veined or wet-cast finish. Use the bone white mix as is or add one of our colors to the mix water. Due to its clay-like consistency, the mix can be used on vertical as well as horizontal surfaces. For Buddy's signature veined look, use right out of the bag. For cast-in-place and trowelled finishes, add 15 pounds of 3/8" pea gravel. For wet-casting, add 3/8" pea gravel or other aggregate and a water reducer.

DVD - BUILDING CONCRETE COUNTERTOPS WITH BUDDY RHODES

Learn to build concrete countertops the Buddy Rhodes way! This DVD provides step-by-step details on how to build concrete countertops using Buddy's materials and methods. Led by Rich Rhoades and specialist Matt Mondini, we go through the whole process: first templating on site, then each step of the fabrication process in our shop, and finally back to the customer's home for installation. Along the way, Buddy, Rich and Matt share the many techniques we've developed over the years to produce distinctively successful results. Plus, there's extra information about Buddy's signature pressed technique, casting in place, custom molds and more.

DVD - ADVANCED TECHNIQUES WITH BUDDY RHODES

Learn to make a counter with an integral sink, form planters and furniture with fiberglass molds, and layer colors the Buddy Rhodes way! This new DVD provides step-by-step details on techniques that you'll want to see after you're comfortable making basic concrete countertops. This time Buddy himself leads the way with Matt Mondini and Joshua Cruz whom you met in the first video. Matt will show you repair and re-sealing techniques in a homeowner's kitchen with a beautiful set of countertops installed nearly ten years before. Buddy will show you how to make your own paste for filling voids and bug holes. This demonstration video takes the pressed technique to the max and offers lots of new tips from Buddy.
