

## HUSQVARNA POWER CUTTERS

### HUSQVARNA POWER CUTTER K760

Designed to cut concrete and masonry in alteration, renovation, and new construction work.

- Active Air Filtration (centrifugal air cleaning in three stages) for extended product life and longer service intervals.
- Engine with X-Torq1 produces more power, higher torque, and 75% fewer emissions.
- SmartCarb (built-in automatic filter compensation) maintains high power and lowers fuel consumption.

25-965141901 12" blade capacity, 5HP

25-965142201 14" blade capacity, 5HP

### HUSQVARNA POWER CUTTER K970 RING

Cuts holes in alteration, renovation, and new construction work. Ideal for adjustment of window and door openings.

- Cutting depth of 10" with a 14" blade - twice the depth of a traditional power cutter.
- Active Air Filtration (centrifugal air cleaning in three stages) for extended product life and longer service intervals.
- Engine with X-Torq1 produces more power, higher torque, and greatly reduced emissions.
- SmartCarb (built-in automatic filter compensation) maintains high power and lowers fuel consumption.
- EasyStart provides 50% easier starts.
- The Poly-V belt provides better power transmission, less retensioning and increased product life.
- Efficient vibration and sound dampening make the machine more convenient to use.

25-966851601 14" blade capacity, 6.5HP

### HUSQVARNA POWER CUTTER K970

Designed to cut concrete and masonry in alteration, renovation, and new construction work.

- Active Air Filtration (centrifugal air cleaning in three stages) for extended product life and longer service intervals.
- Engine with X-Torq1 produces more power, higher torque, and 75% fewer emissions.
- SmartCarb (built-in automatic filter compensation) maintains high power and lowers fuel consumption.
- Easy to start thanks to the decompression valve.
- The Poly-V belt provides better power transmission, less retensioning and increased product life.
- Vibration dampening feature for more convenient operation.

25-968476401 14" blade capacity, 6.5HP

25-968477401 16" blade capacity, 6.5HP

## HUSQVARNA WALK BEHIND SAWS

**HUSQVARNA FS400**

**HUSQVARNA FS500 SERIES**

Ideal for small road repairs and cutting expansion joints in concrete floors.

- Adjustable, low-vibration handlebar for operator comfort.
- Patented gas-assisted raise/lower system.
- Optimum power transmission to the blade due to the Poly-V belt.
- 11 HP gas engine.
- 18 blade capacity.

25-965148208 FS400 Saw

Designed for medium sized service and repair jobs where a self-propelled saw is needed for added production. Ideal for repair and removal of driveways and sidewalks.

- Innovative series of self-propelled flat saws with blade capacities of 18"-24".
- Patented engine and bladeshaft mounting system reduces vibrations and has better cutting performance.
- Patented IntelliSeal bladeshaft system allows for a minimum of 250 maintenance-free hours and eliminates daily greasing of bearings.
- Patent-pending spring-assist screw feed adjustment reduces the force required to adjust the blade in and out of the cut.

25-965150206 FS513 11 HP, 18" blade capacity

25-965150209 FS520 18 HP, 20" blade capacity

25-965150210 FSS524 20-1/2 HP, 24" blade capacity
