

ARTesian WATER-BASED STAIN

Brickform's ARTesian stains are water-based stains designed to penetrate concrete and decorative overlays to create a color effect that is unique to each surface. ARTesian stains do not contain acids or harmful chemicals and ***may be used on interior or exterior projects.***

Trowel-finished concrete ***must be*** mechanically prepared to "open" the surface prior to applying the stain. This is essential to permit the stain to penetrate the surface of the concrete.

Projects colored with ARTesian stains must be sealed with a solvent-based sealer, such as Surface Shine or Deco Shine Plus.

Not sure of which color(s) you want to use? Invest in our sample kit and test several before you begin your project.

- Zero VOC
- Water-Based
- Interior/Exterior Use
- Apply with Sprayer
- Must be Sealed
